

Use Case of Handwritten Digit Recognizer Machine Learning Models

Ashish Piya

USPS Data Frequency

Digits in 28x28 matrix

Model Prediction Performance

Accuracy of 91%

Classification Report			
Digits	precision	recall	F1-score
0	0.95	0.96	0.96
1	0.97	0.95	0.96
2	0.89	0.91	0.9
3	0.9	0.87	0.89
4	0.95	0.88	0.91
5	0.96	0.81	0.88
6	0.96	0.95	0.96
7	0.74	0.93	0.82
8	0.82	0.92	0.87
accurac	0.91		

Model Prediction Performance

Confusion Matrix										
row/col	0	1	2	3	4	5	6	7	8	9
0	761	0	7	5	0	1	5	0	10	0
1	0	917	18	3	4	0	3	1	20	3
2	3	3	734	18	4	0	4	1	43	0
3	6	2	18	792	2	8	0	4	68	12

5	13	1	7	33	5	606	7	0	65	13
6	8	1	1	0	1	12	786	0	15	0
7	3	2	9	2	10	0	0	783	7	82
8	4	13	10	17	2	1	4	0	723	6
9	4	1	4	4	13	0	0	23	14	756

Use Cases of the Model

Add more features to model to classify alphabets

- Transcribing data
- Real-time application form readers

Transcribing Data

Companies can use machine learning model to digitize data

Eg: Cloudfactory

DATA ENTRY JOB
NIGHT SHIFT / PART TIME / FULL TIME
NO EXPERIENCED REQUIRED
ANYONE WITH PASSION CAN APPLY

Do you hate waiting at government offices?

Any
Questions?
